

LI5203 Global Logistics & Supply Chain Management

LI5203 is an elective module (4MC) launched by TLI-AP in conjunction with the Summer School Programme at LOGISTIKUM. It may be used by students to satisfy the MSc (SCM) degree requirements.

Module Description

This course aims to provide a unique enriching experiential learning opportunity to gain a broader understanding and insight into global logistics and supply chains. It will be delivered via an intensive two-week summer school programme at an international partner university, such as Kuhne Logistics University or the Logistikum at University of Applied Sciences Upper Austria.

Adopting a case-based learning approach, students will experience challenging real business cases and workshops designed to combine sophisticated theory with hands-on practical experience in industry. Students will be exposed to educational content with high practical industrial relevance and innovative solutions for companies with state-of-the-art expertise.

The cases will follow the logic and lines of a global supply chain: starting with supplier evaluation, to usage of multimodal transport, cold chain logistics, set-up of SCM function in a company from scratch down to customer delivery, customer segmentation, and ending with the challenges of e-commerce and last-mile delivery.

LI5203 Global Logistics & Supply Chain Management

Learning Outcomes

Students will experience the real challenges of managing a global logistics and supply chain. The summer school will also provide opportunities for close interaction and networking between students from NUS and the partner university. This will in turn help to promote international cooperation of partners throughout the global value chain, which is of fundamental importance for the future economy of Singapore.

Modes of Teaching and Learning

Problem-based learning, company visits and presentations by company executives, case studies and analysis, and group project.

Grading and Assessment Method

- LI5203 will be graded the same as a regular 4MC module.
- Assessment will be by class participation and discussion, case analysis and presentations.

LI5203 Global Logistics & Supply Chain Management

Options: Students are given the option to either

- a) Sign up as a participant in the Summer School and enrol for LI5203, or
- b) Sign up as a participant in the Summer School only

Note: For example, students in the final semester who enrol in LI5203 in AY2017/2018 Special Term 1 will not be able to count this module to graduate in July 2018. They will be able to graduate earliest by 31 August 2018.

As LI5203 is offered in Special Term 1, students who wish to enrol in LI5203 will be required to register for the Special Term and pay tuition fees for Special Term. The fees for AY2017/2018 is given below.

	Tuition Fees for Special Term Part 1 (AY2017/2018)			
	Singapore Citizens	Singapore Permanent Residents	International Students With 3-Year Service Obligation	Non-Subsidized Tuition Fees – regardless of nationality
Full-time students	SGD 1,175.00	SGD 1,643.75	SGD 2,512.50	SGD 4,568.75
Part-time students	SGD 587.50	SGD 825.00	SGD 1,256.25	SGD 2,287.50

Application Details

- **Application Closes:**
 - **3rd week of March** for those who wish to sign up as a participant in the Summer School and register for LI5203 (**No cancellation allowed**)
 - **End of March** for those who sign up as a participant in the Summer School only (**Cancellation until: End of April**)
- **Necessary documents for application:**
 - Application Form
 - Scanned or photo-copy of Passport
 - Resume
