

The Master of Science in Supply Chain Management, MSc (SCM), offered by The Logistics Institute – Asia Pacific, in collaboration with the departments of Analytics & Operations and Industrial Systems Engineering & Management, is an integrated multi-disciplinary programme which combines topics from business and engineering and is ideal for professionals who are keen to advance their careers in the logistics and supply chain industry. This award-winning programme provides graduates with a comprehensive skill set for planning and managing modern supply chains in Asia with a global context, exposure to current issues in the wider context of logistics and supply chain management in a digitalized global economy, and opportunities for in-depth application of business analytics methodologies, such as optimisation, simulation and data analytics, to solve real-world industry problems.

Highlights of the MSc (SCM) Programme

- Top-notch professors from NUS Business School and Faculty of Engineering
- Sharing of insights from industry experts linked with The Logistics Institute – Asia Pacific
- Experiential learning of Global Logistics & Supply Chain Management via Summer school in Europe
- Organized learning trips to industry sites and centres of innovation in supply chain management
