Asian Institute of Management

This program offers a deep dive into Asia's dynamic logistics landscape and a great opportunity to meet leaders and key decision makers driving the future of interconnected supply chains in the Philippines and Asia, understand their perspectives and how Singapore based organizations can leverage this learning to design and build transformative supply chains.

The program also aims to equip participants with an understanding of the business climate, provides insights into logistics and supply chain landscape, challenges and its development, identifies potential advance applications in Singapore and business opportunity in the wider region.

Who should attend:

This course is designed for Senior Management, Senior Managers, and Managers engaged in logistics/supply chain operations, business development, solution development, process improvement, and innovation.

Course Objectives:

- **Understanding the Business Climate**

Equip participants with an understanding of the business environment in Asia, with a focus on the Philippines.

- **Insights into Philippines Logistics**

Provide detailed insights, examine current challenges and ongoing developments in Philippines logistics from top executives, leading academics and relevant government agencies.

- **Leverage Logistics Connectivity**

Engage in practical learning through interactive sessions and expert-facilitated visits to state-of-the-art logistics and supply chain facilities in Manila, gain insights into operational practices, and technological advancements to enhance efficiency in the supply chain.

- **Cultivate Connections**

Build relationships with peers in the Philippines.
